Chapter 12 - Developing a Preventative Pruning Program ...

storm Pruning may have prevented this damage Figure w The codominant stem (top) split from the tree because of a weak branch connection and included bark Proper structural pruning could have prevented this defect from failing The large lower limbs (bottom) of these mahogany trees are too close to the ground and will have to be removed

HELP! I FOUND A BABY DOVE ON THE GROUND!

tree (if the original nesting spot is too high) and secure the nest there Make sure the nest is protected from the sun If you cannot get the old nest, a makeshift nest can be made Use a small, nest size basket (no laundry baskets!) lined with straw, dried grass, or the remains of the old nest inside Natural fiber and natural color is best

Twelve Reasons Why People Lose Their Purple Martins

Too many martin landlords offer just one 12-unit martin house While this is enough to start a colony, it is not enough to ensure long-term colony site survival! Landlords should offer multiple houses and/or at least 24 total nesting compartments They should strive to build their colonies to at least 12-15 breeding pairs Because conven-

Developing a preventive pruning program: Young trees

storm Pruning may have prevented this damage Figure w The codominant stem (top) split from the tree because of a weak branch connection and included bark Proper structural pruning could have prevented this defect from failing The large lower limbs (bottom) of these mahogany trees are too close to the ground and will have to be removed

Hand of HELP

It's hard to pinpoint where one storm ended, and another began It seems as though up until now this year has been one constant storm, and as soon as you caught your breath from the first wave that crashed upon you, a second was on its way, eager to prove itself and its ability to wreak havoc We've always known the storms were inevitable,
