Voyage: A Journey through our Solar System Grades 9-12 ...

Voyage is a 1 to 10-billion scale model of the Solar System that was permanently installed in Washington, DC, in October 2001 The real Solar System is exactly 10 billion times larger than the Voyage model On this scale the Sun is about the size of a large grapefruit The Earth is 15 meters (50 feet) away and smaller than the head of a pin

Voyage: A Journey through our Solar System Grades 5-8 ...

The Sun The Sun is a star The reason it looks so big and bright as compared with the stars in the night sky is that it is very close to the Earth If the distance from the Sun to Earth (about 150 million km; or about 93 million miles) is scaled to about 15 m (45 ft), the nearest star to the Sun would be located over 4,000 km (2,490 miles) away

Voyage: A Journey through our Solar System Grades 5-8 ...

The sun is a major source of energy for changes on the earth's surface The sun loses energy by emitting light A tiny fraction of that light reaches the earth, transferring energy from the sun to the earth The sun's energy arrives as light with a range of wavelengths, consisting of visible light, infrared, and ultraviolet radiation
